

## Authors guideline

Paper publication in Scientific Perspectives Publishing journals is through following steps:

1. **Paper submission** through journal website (paper must be according to guidelines and it must be in journal **Template** document)
2. **Review process** will begin after receiving the paper by editorial. It usually lasts about 2 weeks (30-45 days). Papers might be accepted, or accepted with revision or rejected. For each status, instructions will be sent for author.
3. **Final approved paper submission** is the next step. Author with accepted paper is asked to prepare the final version of paper and submit it through journal tracking system.
4. **Official Acceptance Letter** will be issued for the papers that finish the steps 1 to 3.
