

Guide for Authors

To submit a manuscript, first make sure you have a Word file from which the all author-identifying references have been removed. All manuscripts should be prepared in Word software including 3 centimeters from right, left, up and down of pages, and also 1.15 centimeters spacing between lines. In order to facilitate processing of submissions, please make sure that there is nothing in your file that identifies the authors. The title page should be prepared and sent along with the authors' details in a separate page. The submission contains few and only necessary footnotes or endnotes. Any hypotheses are explicitly identified as such. Constructs and variables are identified in words, not abbreviations.
